

Audit de Performance

Mon audit de performance est basé sur le temps de réalisation de chaque requête.

Route	Controller	Requêtes de performance
homepage	App\Controller\DefaultController::indexAction	<div>Performance metrics<div><div>Total execution time162ms</div><div>Symfony initialization33ms</div></div></div>
task_create	App\Controller\TaskController::createTask	<div>Performance metrics<div><div>Total execution time222ms</div><div>Symfony initialization23ms</div></div></div>
task_list	App\Controller\TaskController::listAction	<div>Performance metrics<div><div>Total execution time372ms</div><div>Symfony initialization36ms</div></div></div>
task_toggle redirect to task_list	App\Controller\TaskController::ToggleTaskAction	<div>Performance metrics<div><div>Total execution time105ms</div><div>Symfony initialization9ms</div></div></div>
task_delete redirect to task_list	App\Controller\TaskController::DeleteTaskAction	<div>Performance metrics<div><div>Total execution time158ms</div><div>Symfony initialization7ms</div></div></div>
app_login	App\Controller\SecurityController::login	<div>Performance metrics<div><div>Total execution time123ms</div><div>Symfony initialization14ms</div></div></div>

user_list	App\Controller\UserController::listAction	<div><div>Performance metrics</div><div><div>Total execution time</div><div>60ms</div></div><div><div>Symfony initialization</div><div>10ms</div></div></div>
user_edit	App\Controller\UserController::editAction	<div><div>Performance metrics</div><div><div>Total execution time</div><div>135ms</div></div><div><div>Symfony initialization</div><div>13ms</div></div></div>
user_create	App\Controller\UserController::createAction	<div><div>Performance metrics</div><div><div>Total execution time</div><div>98ms</div></div><div><div>Symfony initialization</div><div>10ms</div></div></div>
